IRON ORE RUST REMOVER

Iron Ore Cleaning Detergent

Iron Ore Cleaning Detergent is a specially formulated industrial cleaning chemical designed to remove dirt, dust, oil, grease, and other surface contaminants from iron ore, mining equipment, conveyors, hoppers, storage areas, and handling systems.

Iron Ore Red Dust Cleaner manufacturer, supplier and exporter. Iron Ore Red Dust Cleaner is advanced blend of non corrosive cleaner with additional base and inhibitor. Its powerful chemical rust removal action dissolves rust without any mechanical action. This is the reason why Iron Ore Red Dust Cleaner used in removal of iron ore stain without reaction on paint, rubber, plastic and glass. Iron Ore Red Dust Cleaner is frequently used in the mining and construction industry and also most commonly use to clean SHIP HOLD after discharging of IRON ORE.

Applications:

- Iron ore handling and processing plants
- Iron Ore Handling Ship Hold Bulk Carrier
- Mining equipment and machinery
- Conveyor belts and transfer points
- Hoppers, chutes, and loading areas
- Storage yards and industrial floors
- Trucks and material-handling equipment

Test Iron Ore Red Dust Cleaner on a small inconspicuous area before use.

Do not apply Iron Ore Red Dust Cleaner undiluted.

A more concentrate dilution may be required where concrete has been cured for an extended period of time.

Do not leave Iron Ore Red Dust Cleaner on any surface for extended periods of time.

To maintain product integrity, keep container sealed when not in use.

Use 10 to 20% of Iron Ore Red Dust Cleaner with fresh water and left to react for 5 - 40 minutes then the residues should be rinsed off thoroughly with clean water jet. Click for More details <http://rxmarine.com/Iron-Ore-cleaning-direction>

This is very effective chemical for Iron ore and rust removal action. Which dissolves Iron Ore rust from all kinds of surface.

Key Benefits:

- Removes oil, grease, and organic contamination
- Helps clean dirt, dust, and accumulated deposits
- Suitable for mining and mineral-processing environments
- Helps improve the cleanliness of iron ore handling equipment
- Effective for cleaning conveyors, machinery, floors, and loading areas
- Can be used in manual, spray, or pressure-washing applications

If hardness contaminations remain repeat the process. Also cleaning property can be increase at temperature of 75 to 80 °C

Very effective products to removes rust and stains also improves metal appearance.

Direction for use

FOR HEAVY DUTY IRON ORE RUST REMOVER should be diluted with water 1:4 . Then solution can be applied by brushing, spraying for 10 - 20 minutes the residues should be rinsed off thoroughly with high pressure water.

STOCK POINT : Mumbai, Kandla, Vizag, Chennai, Kolkata, Fujairah, Muscat
