Iron Ore Red Dust Cleaner

Iron Ore Red Dust Cleaner manufacturer, supplier and exporter. Iron Ore Red Dust Cleaner is advanced blend of non corrosive cleaner with additional base and inhibitor. Its powerful chemical rust removal action dissolves rust without any mechanical action. This is the reason why Iron Ore Red Dust Cleaner used in removal of iron ore stain without reaction on paint, rubber, plastic and glass. Iron Ore Red Dust Cleaner is frequently used in the mining and construction industry and also most commonly use to clean SHIP HOLD after discharging of IRON ORE.

Direction for use

Iron Ore Red Dust Cleaner Usage Directions

Directions for Use

In general Dilute 1 part Iron Ore Red Dust Cleaner with 4 parts water and spray onto the surface being cleaned, And allow Iron Ore Red Dust for 20 to 40 Minutes to penetrate.

And For Hard Deposits Vigorously agitate the on the surface being cleaned with a stiff bristled brush or broom. And allow Iron Ore Red Dust for 20 to 40 Minutes to penetrate. Again, vigorously agitate the surface. The iron ore will begin to break up and be released from the substrate.

Stubborn areas may need to be again saturated and left for a further 10 minutes before vigorously agitating.

Rinse the surface with a high pressure washer or hose until all dissolved concrete and Iron Ore Red Dust Cleaner has been removed from the surface being cleaned.

Test Iron Ore Red Dust Cleaner on a small inconspicuous area before use.

Do not apply Iron Ore Red Dust Cleaner undiluted.

A more concentrate dilution may be required where concrete has been cured for an extended period of time.

Do not leave Iron Ore Red Dust Cleaner on any surface for extended periods of time.

To maintain product integrity, keep container sealed when not in use.

PHYSICAL Properties

Appearance	Clear & Colourless fLiquid
Specific gravity (200C)	1.1
Flash point cc	None
R 34	Causes burns.
S 26	On contact with eyes,Wash eye ball immediately with plenty of water and seek medical advice.

Safety and Environment Safety Iron Ore Red Dust Cleaner is classified as a skin irritant in its concentrate form and is classified as nonhazardous for transport according to the Australian Dangerous Goods Code. This “non-DG” classification also means less regulated storage of Iron Ore Red Dust Cleaner containers on construction sites and industrial warehouses. Whilst Iron Ore Red Dust Cleaner displays a very low hazard profile for the user in terms of its effect on skin, eyes and respiratory system it is recommended to always wear protective gear including but not limited to chemical proof coveralls, goggles, gloves and rubber boots to minimize exposure to concrete residues and prolonged contact with Iron Ore Red Dust Cleaner

Biodegradation and Aquatic Safety Iron Ore Red Dust Cleaner is readily biodegradable, phosphate free and does not contribute to the eutrophication of waterways.

Waste Water Systems Red Dirt Buster has very low COD and BOD levels making it an excellent choice for use where wastewater processing systems are used. It is, however, recommended that pH readings be taken to ensure that wastewater pH readings comply with board recommendations
